

What's your professional responsibility?

Revisions to KRS 209A effective July 2017 require health, school, faith, law, social, and other professionals to provide resources and referrals for suspected victims of domestic violence in Kentucky.

**Health. School. Faith. Law.
Social Services. Community.**

If you have professional interaction with someone you believe to be a victim of domestic violence, dating violence, or abuse, you must give the person educational materials related to the abuse. This information must include how the victim may access domestic violence programs and protective orders.

Revisions to KRS 209A do not change the existing mandatory reporting of child abuse/neglect or vulnerable adult abuse/neglect/exploitation.
