

Children's Safe Exchange & Visitation

We honor the importance of the parent and child relationship. And commit to strengthen this bond without children worrying about conflict, intimidation, control, and further abuse.

Safety. Boundaries. Bonding. Healthy Relationships.

Visitation for noncustodial parents and one or more children is provided from a safe, secure environment. Visits take place at our facilities and are supervised by specially trained visitation monitors.

Safe exchange includes security to assure parents do not come into contact with each other during exchanges of children before and after off-site visitation.

Visit our website or contact us by phone for more information. Children's Safe Exchange and Visitation advocates can be reached at 859-268-0487.
